## PRODUCT MANAGER — OCCUPATIONAL HEALTH & SAFETY (EHS) SYSTEMS

Product Manager with 8+ years building enterprise occupational health and safety platforms, translating clinical, compliance, and safety workflows into B2B SaaS products used by clinics, employers, and safety directors. Led a \$8.3M cloud migration pipeline across 280+ occupational health clients (188 identified migration-ready, 95% retention) and currently own product strategy for an employer-facing occupational health data portal. Skilled at translating field and clinical requirements into product specs, securing executive investment through data-driven ROI cases, and leading cross-functional and cross-continent delivery teams.

**Core Skills:** Occupational Health & EHS Platforms | B2B SaaS Product Management | Requirements & Business Analysis | System Migration & Cloud Architecture | ROI Modeling & Executive Storytelling | SQL & Data Analytics | Cross-Functional & Distributed Team Leadership

---

## EXPERIENCE

### UL Solutions (#1 Global Safety Science Company, 10,000+ Employees)

*Product Manager, EHS (Employee Health and Safety) — San Jose, CA | 04/2022 – Present*

- Led business analysis and requirements gathering with 58+ EHS and safety directors, translating clinical and safety-training pain points into migration and product roadmap priorities
- Ran SQL-based module parity analysis across 280+ legacy occupational health clients to build a \$8.3M cloud migration pipeline, identifying 188 migration-ready accounts and achieving 95% retention
- Built the ROI model and business case that secured \$5.8M in platform investment from the VP of Product
- Led a 7-member cross-functional "tiger team" through the OHM-to-OHS occupational health platform migration, developing 15 strategic migration solutions that cut the timeline by 42+ weeks and delivered \$2.3M in operational cost savings
- Launched a self-service deployment framework for the occupational health platform, cutting client implementation time from 4–6 weeks to 1 week (75% reduction)
- Delivered a web-based Incident Manager module (standardized injury/illness, near-miss, and workplace hazard reporting with investigation and corrective-action workflows) as part of an integrated occupational health, safety training, and learning management suite
- Currently serve as Product Owner for iSYSTOC & Employer Portal (Team Red Five), modernizing the employer-facing occupational health data portal; drove the Phase 1 authentication architecture decision (independent Portal login with email/password + MFA, SSO scoped for Phase 2) and coordinate a distributed team across the US, Brazil, and India

### Locus Technologies (Silicon Valley EHS SaaS Pioneer since 1997)

*EHS Product Manager, Environmental Health & Safety Analytics Platform — Mountain View, CA | 07/2017 – 04/2022*

- Drove 27% contract growth (\$1.2M ARR) leading the EHS platform roadmap for healthcare, industrial, and manufacturing clients across 3 regions
- Shipped 4 integrated compliance applications, including an Occupational Health Management module, from concept to launch, achieving 100% customer renewal
- Built 30+ SQL/analytics dashboards visualizing occupational health and safety KPIs, reducing reporting time 40% and enabling data-driven interventions across a \$5M+ client portfolio
- Managed enterprise implementations spanning compliance operations, safety directors, and IT leadership, maintaining 91% customer satisfaction

### City of San Diego

*Environmental Engineer, Technology & Compliance — San Diego, CA | 10/2016 – 02/2017*

- Led EHS software implementation across multiple city operation units, aligning technical system specs with frontline field operations
-
